WHAT I WORK WITH

Technical Skills

Programming

Python SQL Git

Web Technologies

HTML CSS Version Control

AI & Machine Learning

AI Fundamentals ML Basics Data Analysis

IoT & Security

IoT Security · PUF Concepts · Auth Systems

Blockchain

Blockchain Fundamentals · Immutable Storage · QR Verification

WHAT I'VE BUILT

Projects

BLOCKCHAIN · 2023

01

Fake Product Identification System Using Blockchain

An anti-counterfeit solution using blockchain technology with QR code-based product verification. Designed immutable storage to prevent tampering and applied Python & ML for system

validation.

Python Blockchain QR Code ML

IOT SECURITY · 2025

02

Secure & Anonymous User Authentication for IoT Smart Homes Using PUF

Designed enhanced authentication for IoT smart home environments ensuring secure communication, user anonymity, and integrated PUF mechanisms to strengthen device security.
